## BG-Manager

**BG-Manager** is a fully automatised product for generating and mailing schedules in the formats KISS-A and ESS. This product has been used by Austrian balance groups since 2002 (KISS-A Version) and will start generating ESS-schedules on Dec 2, 2003.

### Features

- Fully automatised generation and mailing of schedules
- Versions of components according to market rules
- Storage of mailed components in the data base
- Automatic processing and evaluation of answer mails (DATA QUIT, ACKNOWLEDGEMESSAGE, etc)
- Flexible timing by schedules and scripts
- Simple configuration via browsers
- Storage of calculation rules for components by Polish Notation
- Configuration of clients and partners
- Configuration of schedules (balances)
- Redundance-free configuration of component calculations and components
- Combination of several schedules (balances) in a balances group
- Placing of orders for execution on the basis of incoming schedules and forecasts
- Visualisation of the placed orders for execution as well as their status in the intranet.
